Designation

An economical, entry level tank alarm coming with a 5m single probe to alert of presence of fluid in the bund (e.g. retention tray).

Application

Suitable for use with clean diesel and light oils (or version AdBlue®).

+ Product

- Simple & cost effective solution if only bund alert is required
- Used to indicate either the inner tank leaking into the bund or excess rain water and debris that has built up
- Battery powered for use on portable installations or sites where mains power is inaccessible (1 x PP3 Alkaline 9V supplied)
- Flashing red LED & 90db alarm will sound to alert the user that the set level has been reached
- Test & alarm mute functions
- IP55 enclosure with 4 external mounting lugs
- Simple operation means battery will last in excess of 72 hours in full alarm mode, making it ideal for sites not always manned
